

Outcome of the IHI JU Science and Innovation Panel on ideas submitted for potential IHI topics

Reference number of the idea: N° TI_001173

Novel nuclear theranostics for personalised cancer diagnosis and care

Overall opinion

The idea is very interesting and has the potential to deliver results in the future care of advanced cancer. The SIP believes that it is important to develop theranostic tools to improve the therapeutic index of targeted treatments and to control the financial cost to public health.

The idea is ambitious, timely and scientifically sound and should be duly considered by the Governing Board as a priority.
